Education

2022- Date
BSc. in Computer Science

Maasai Mara University

CORE COMPETENCIES

Technical Skills:

- Programming: JavaScript, TypeScript, Java, Python, C/C++, React, NodeJS
- Cisco Packet Tracer, Network Configuration & Troubleshooting.
- AI & Machine Learning

Database Management:

- SQL (Structured Query Language), PostgreSQL
- Firebase Integration
- Cloud Computing

Attributes:

- Problem-Solving
- Team Collaboration & Teamwork Excellence
- Excellent Written & Verbal Communication

Festus Kipyegon

Personal Summary

Results-driven Computer Science undergraduate with hands-on experience in software development and database systems. Developed functional software using React, Node.js, and TypeScript, featuring Firebase integration for real-time data synchronization and M-Pesa for secure payments. Implemented data validation and integrity checks to ensure accurate records essential practices for database management, quality assurance, and system reliability.

Proactive team player with excellent organizational skills and attention to detail, eager to leverage my technical foundation to ensure data accuracy, system integrity, and operational excellence.

Passionate about continuous learning, I am eager to expand my expertise, tackle complex development challenges, and deliver impactful digital solutions that align with organizational goals

Experience

Technology Attachment

○ **5th May 2025 to 2nd August 2025.**

DEPARTMENT OF ICT & E-GOVERNMENT NAROK COUNTY

Responsibilities

- a) Installing and configuring computer hardware, Operating Systems, and applications.
- b) Maintaining and troubleshooting system & network problems, diagnosing and solving hardware and software faults.
- c) User support and assisting employees on issues with handheld devices.

PROJECTS & TECHNICAL ACHIEVEMENTS

○ Smart Healthcare Appointment Management System

Technologies Used: React, TypeScript, RESTful APIs, Node JS, Machine Learning

Developed a web-based Smart Healthcare Appointment Management System designed to streamline patient-centered services and optimize clinical workflows. Implemented intelligent patient behavior analysis, automated SMS notification systems, and dynamic slot allocation to reduce no-show rates and balance provider workloads. The system involved complex data synchronization, real-time scheduling logic, and resource management skills directly transferable to database administration, system reliability, and high-traffic backend operations.

○ E-commerce Mobile App

Technologies: Java, Local SQLite

Developed a mobile e-commerce application with a local SQLite database for optimized data storage and offline persistence. Implemented a functional cart system, RecyclerView for efficient data rendering, and secure M-Pesa payment integration—gaining practical experience in transaction management, data integrity, and secure financial data handling.
